

A DIFFERENT KIND OF EDUCATION AT ENARTIS' 'STABILISATION SCHOOL'

FROM TANK TO BOTTLE

ENARTIS' STABILISATION SCHOOL

31 JULY - 2 AUGUST 2018

Enartis invites you to attend its 'Stabilisation School', where an esteemed panel of expert speakers will address the challenges and solutions associated with wine stabilisation, all the way from tank to bottle.

The events, held in Stellenbosch and Vredendal, will be a complete, interactive and information-packed forum for anyone with an interest in winemaking and wine stability. Following the talks, winemakers will get to experience and taste wines treated with various 'oak alternative' products from the Enartis range.

"WAITER, THERE'S A CRYSTAL IN MY WINE!"

How much do you really know about post-fermentation? What about terms like shelf-life improvement, aroma, and colour stability? Can you explain to an irate customer how chilled and harmless tartar cream precipitated as fine crystals in his or her favourite bottle of wine?

Enartis invites you to attend its second 'Stabilisation School' where leading minds from both the local and international scene will come together to explore the issues surrounding wine stabilisation. The seminar will tackle all aspects regarding your wine post fermentation – additions, filterability, the wine that travels and shelf life improvement.

FOLLOWING THE TALKS, winemakers will get to experience and taste wines treated with various 'oak alternative' products from the Enartis range.

THE EVENTS, which will be held in Stellenbosch and Vredendal, will be a complete, interactive and information-packed symposium for those with an interest in wine-making and wine stability.

BOOK YOUR SEAT

To register, send an email to sales@enartis.co.za or call 021 870 1181. Deadline for registration is **10 July 2018**. Both events will include lunch.

TOPICS TO BE DISCUSSED:

TESTING WINE STABILITY

(fining, analysis and interpretation)

THE LATEST ON ZENITH®

(revolutionary tool for total wine stability)
